

## Strengthening Families with the 5 Protective Factors

- 1. Resilience**  
Resilience is the ability to bounce back from all types of challenges. It means finding ways to solve problems, building and sustaining trusting relationships, taking care of you, and knowing it is OK to seek help when necessary.
- 2. Social Connections**  
Everyone needs to feel cared for and connected. Friends, family members, neighbors and community members provide emotional support, help solve problems, offer insights and give concrete assistance.
- 3. Knowledge of Parenting & Child Development**  
Being a good parent is part natural and part learned. Parents, who understand child development, are responsive to their child's needs and practice positive parenting strategies will feel more engaged and empowered. Kids thrive in an environment that fosters secure attachments and healthy development.
- 4. Concrete Support in Times of Need**  
Everyone faces challenging times. It is important to know where to access support services and that it is OK to ask for help.
- 5. Teach Children Social and Emotional Competence**  
Be a good role model. Teach children to communicate clearly and express their feelings effectively. Help them learn how to be a good friend. A child/youth who is able to interact positively with others, self-regulate their behavior and effectively communicate their feelings will be able to build and sustain healthy relationships throughout their lifetime.

## Fortaleciendo Familias con los 5 Factores de Protección

- 1. Resiliencia**  
Resiliencia es la habilidad de recuperarse de todo tipo de desafíos. Significa encontrar maneras de resolver problemas, desarrollar y mantener relaciones de confianza, cuidar de si mismo, y saber que está bien buscar ayuda cuando sea necesario.
- 2. Conexiones sociales**  
Todo el mundo necesita sentirse querido y conectado. Amigos, miembros de la familia, vecinos y miembros de la comunidad proveen apoyo emocional, ayudan a resolver problemas, ofrecen entendimiento y dan asistencia concreta.
- 3. Conocimiento de la crianza del niño y del desarrollo del niño**  
Ser un buen padre es una habilidad en parte natural y en parte aprendida. Aquellos padres que entienden los principios del desarrollo del niño, responden a las necesidades del niño y practican estrategias de crianza positivas se sentirán más comprometidos y fortalecidos. Los niños progresan en un ambiente que fomenta apego seguro y desarrollo saludable.
- 4. Apoyo concreto en momentos de necesidad**  
Todo el mundo enfrenta momentos difíciles. Es importante saber dónde encontrar servicios de apoyo y que está bien pedir ayuda.
- 5. Enseñe competencia social y emocional a los niños**  
Sea un buen ejemplo. Enseñe a los niños a comunicarse claramente y a expresar efectivamente sus sentimientos. Ayúdelos a aprender ser un buen amigo. Un niño quien puede interactuar positivamente con otros, auto-regular su comportamiento y comunicar efectivamente sus sentimientos podrá desarrollar y mantener relaciones saludables a través de su vida.
