You don't often get email from becky.scanlon@gmail.com. [Learn why this is important](#)

[EXTERNAL EMAIL]

Hi Laura,

Thanks for reaching out! I would be grateful to get this in for the June 19th meeting. See below for all the information.

Electricity - The trailer has solar panels and a battery bank. The electricity produced is enough to cover all our electricity needs.

Water - Until our well is operational we plan to bring water in using 5 gallon water jugs.

Sewage/wastewater Removal - All grey water/black water will be captured and disposed off site at proper facility. All solid waste will also be disposed of off site at proper facility.

Please let me know if there is anything else!

Thanks,
Becky Scanlon

Subject: Director Review for Use of RV

Hi William and Rebecca,

In reviewing your application for Director Review to temporarily park a trailer for residential use during the construction of a single-family home, it appears the following information is missing:
